

ABSTRACT OF THE DISCLOSURE

5 A light emitting diode (LED) warning signal light, the warning signal
light comprising a plurality of light sources constructed and arranged with a reflector or
culminator, the LED light source being in electrical communication with a controller and
a power supply, battery, or other electrical source. The warning signal light provides
various colored light signals for independent use or use on an emergency vehicle. The
warning light signals may include a strobe light, revolving light, an alternating light, a
flashing light, a modulated light, a pulsating light, an oscillating light or any combination
10 thereof. The controller may further be adapted to regulate or modulate the power
intensity exposed to the illuminated LED's to create a variable intensity light signal.
